D-Mannose

Topical Vaginal  
Estrogen

Antibiotics

### TREATMENT

Call IU Urogynecology with symptoms of urinary tract infection. **(317) 688-3700**

Oral Antibiotics

IV Antibiotics

## CUT OUT AND CARRY WITH YOU

### If you think you have a bladder infection:

Call the office (Mon-Fri, 8am-430pm) at (317) 688-3700. We will try to see you the same day before we close to check your urine for an infection. We will likely give you an antibiotic if your urine seems to be infected.

After business hours on weekends, we'd still like you to have your urine checked at an IU Health Facility or urgent care center. If you go to one of these offices, **please ask for a URINE CULTURE** and ask them to **fax the results to your urogynecologist at (317) 968-1449**. They will likely give you an antibiotic if your urine seems to be infected.
